

Melspring launches Marathon TCR

Harrogate, 17-19 January 2017 – At the Bigga Turf Management Exhibition (BTME) in Harrogate Melspring International B.V. has launched its new product Marathon TCR. At the booth of Sherriff Amenity, that distributes the Melspring product range in the United Kingdom, Melspring proudly presented Marathon Turf Core Renovator to the audience for the first time. Marathon TCR is an extremely versatile product that can be used on all areas of the golf course (roughs, fairways, greens) as well as on sports turf pitches and ornamental lawns that where re-vitalised or aeriated with active organic matter.

Marathon TCR is a proprietary organo mineral complex for better nutrient efficiency. Marathon TCR was developed to provide rapid recovery from stress situations on fine turf areas caused by essential maintenance. It contains a mixture of nitrogen sources to provide both immediate and prolonged growth for recovery so that playing surfaces can be quickly returned to use. The formula is NPK 4-3-4 + 8 CaO + 3.5 MgO + 0.5 Fe and usage of the product results in a rapid sod closure and reduction of stable soil organic matter.

Key benefits:

- Rapid recovery from essential maintenance
- Helps deal with the stress and abrasion caused by re-filling core holes
- Fast green-up of damaged turf
- Ammonium nitrogen content allows use in cooler conditions
- Simple and cost-effective

Notes to editors:
